### Short Resume:

**Position:** Full-Stack Developer with expertise in scalable web applications and backend microservices

**Skills:** Proficient in TypeScript, Node.js, Express, React, and Next.js; experienced in microservices architecture, database optimization, AWS S3 integration, test coverage improvement, reusable component design, and secure third-party API integration.

**Experience:** Built scalable solutions at Payhippo, Arvo Finance, and Exquis; boosted performance, reliability, and test coverage. Google Challenge Winner (MEA, 2017).

**Motivation:** I am motivated to move to Germany for career growth and a higher quality of life in its vibrant tech environment.
