TechStack:

Security Tools: Splunk, Nessus, Wireshark, Burp Suite, Metasploit, Snort, KnowBe4

Systems & Networks: Cisco ASA, Juniper SRX, Palo Alto, OPNsense, DMARC, IDS/IPS,

Scripting & Automation: Python, PowerShell, Bash

Cloud & Infra: VMware, Active Directory, Exchange, DNS (Bind9), Apache

Short Resume:

Position: Cybersecurity Engineer with 7+ years of experience securing enterprise systems, mitigating vulnerabilities, and improving security operations through automation and training.

Experience: Unmesh has worked across Germany, the UAE, and the US in both hands-on engineering and advisory roles. He recently completed projects in Munich and Frankfurt involving Exchange migration scripting, AD security, and firewall policy design. Past roles include handling incident response, DMARC implementation, and user training for organizations with 300+ staff.

Motivation: Unmesh is enthusiastic about relocating to Germany, attracted by its strong economy, demand for skilled professionals, and clear pathways to long-term residency through the EU Blue Card.

Starting in Germany:
After 6 - 8 Weeks

BlueCard eligible:
Yes

Starting Salary: €60,000
University degree:
MSc in Cybersecurity
BTech in Computer Science

English: Fluent (C1)
German: Basic (A2)
